

# EMPOWERING THE PACIFIC ISLANDS: INTEGRATING SATELLITE INTERNET FOR ENHANCED CONNECTIVITY

**KACIFIC  
BROADBAND  
SATELLITES  
GROUP**

Being a broadband satellite company

# OVERVIEW OF KACIFIC1

State-of-the-art GEO satellite with **60 Gbps** bandwidth and useful life of **15 years**

High Throughput Satellite (HTS) payload

**56 spot beams** place capacity over selected islands and land mass

Transmitting over high-powered Ka-band

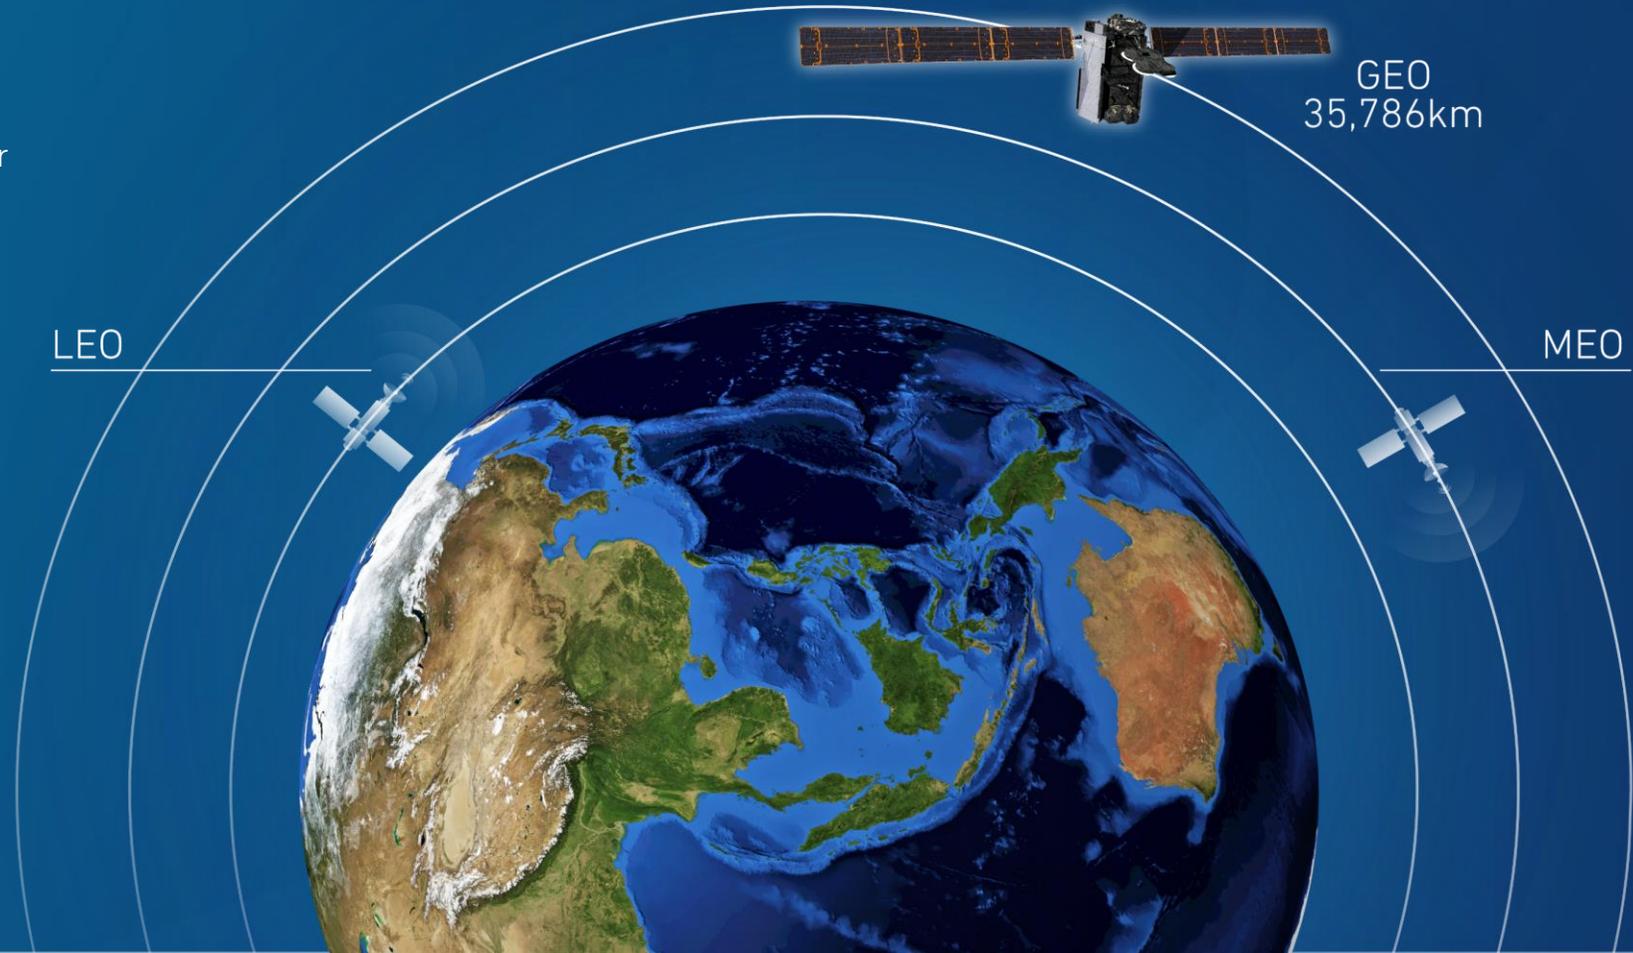

**3 centralized gateways** built in Australia, Philippines & Indonesia

**99.97% availability**  
Reliable internet and latency suitable for nearly all regular internet usage, such as video streaming, voice calls over IP, browsing and distribution via 3G or 4G networks

## Kacific-1

# KACIFIC COVERS 25 COUNTRIES IN ASIA PACIFIC

- American Samoa
- Bangladesh
- Bhutan
- Brunei
- Cook Islands
- East Timor
- Fiji
- French Polynesia
- Guam

# STATE OF DIGITAL IN THE PACIFIC

## Unique Challenges and Opportunities in the Pacific

Approximately **20,000 to 30,000 islands**, spread across an area of more than **165 million square kilometres**.

~ **27.3%** of the population are **young (18 – 34) & eligible tech-savvy** users.

To enhance **mobile network accessibility** across the Pacific island nations from the current **27%**<sup>^</sup> penetration rate; there is room for improvement compared to the global average of over **90%**.

<sup>^</sup> **The Mobile Economy Pacific Islands 2023 Report, GSMA**

# EMPOWERING PARTNERS & ISPS IN PACIFIC

Kacific partners with local ISPs through a **revenue-share agreement**, ensuring over **40% of revenue** stays in the operating country and supports the economy.

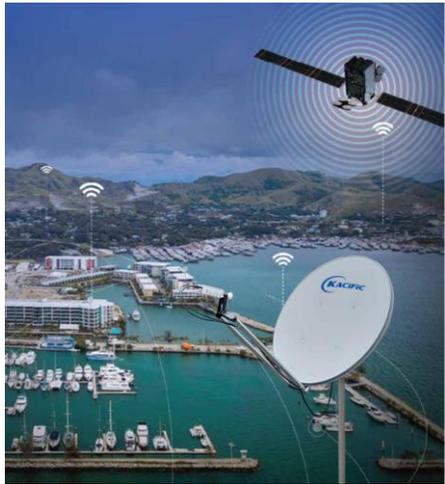

- **Local team support includes:**
  - Recruiting and training Kacific Authorized Distributors (KADs), who sell and install satellite terminals in provinces.
- **Benefits for KADs:**
  - Acquire skills in ICT, installation, and sales.
  - Earn installation fees and receive terminal consignment discounts.
  - Gain recurring incentives from aftersales servicing.

# SATELLITE-POWERED DIGITAL INFRASTRUCTURE

Role of Satellite Broadband Connectivity, Tower Infrastructure and 4G Solutions for the Pacific

## Powerful, flexible, Satellite Broadband Solution

Satellites offer **cost-effective** broadband services to remote and rural areas, where traditional terrestrial infrastructure may not be feasible to deploy, providing resilience against **natural disasters**.

## Scalable and Reliable Solution

Reliable alternative to existing connectivity solutions, assessing the current technology or coverage requirements, and **upgrading the current 3G sites**.

## Upgrade to Latest 4G Technology

Transforming legacy equipment in rural sites to robust **4G connectivity hubs**.

## Comprehensive Digital Inclusion

Ensuring comprehensive **digital inclusion** by providing high-quality, affordable broadband access.

## Socio-Economic Catalyst

Leveraging 4G infrastructure as a service (IaaS) to **stimulate** socio-economic development in the **Rural areas**.

# K-TOWERS – INFRASTRUCTURE AS A SERVICE

**K Towers**, a subsidiary of Kacific, specialises in managing telecommunication infrastructure and is implementing Telecom Infrastructure as a Service (TlaaS) at **70 remote sites** in Western Papua New Guinea and **2300 remote sites** in the Philippines.

Concept Tower design

Mobile Tower

Monopole Tower

Self Supporting Tower

Heavy Duty Tower

# SERVICE OFFERINGS

**1**

Infrastructure Managed Service - Complete Passive & Power Infrastructure outsourcing

**3**

Infrastructure buyout and lease back

**2**

Opex Model Build to Suit (New site build) – Complete end to end Infrastructure deployment

**4**

Additional Services

- Digitalization of Infrastructure (Drown Capture)
- Enterprises Services

## Benefits of Solutions

Low cost 4G Network

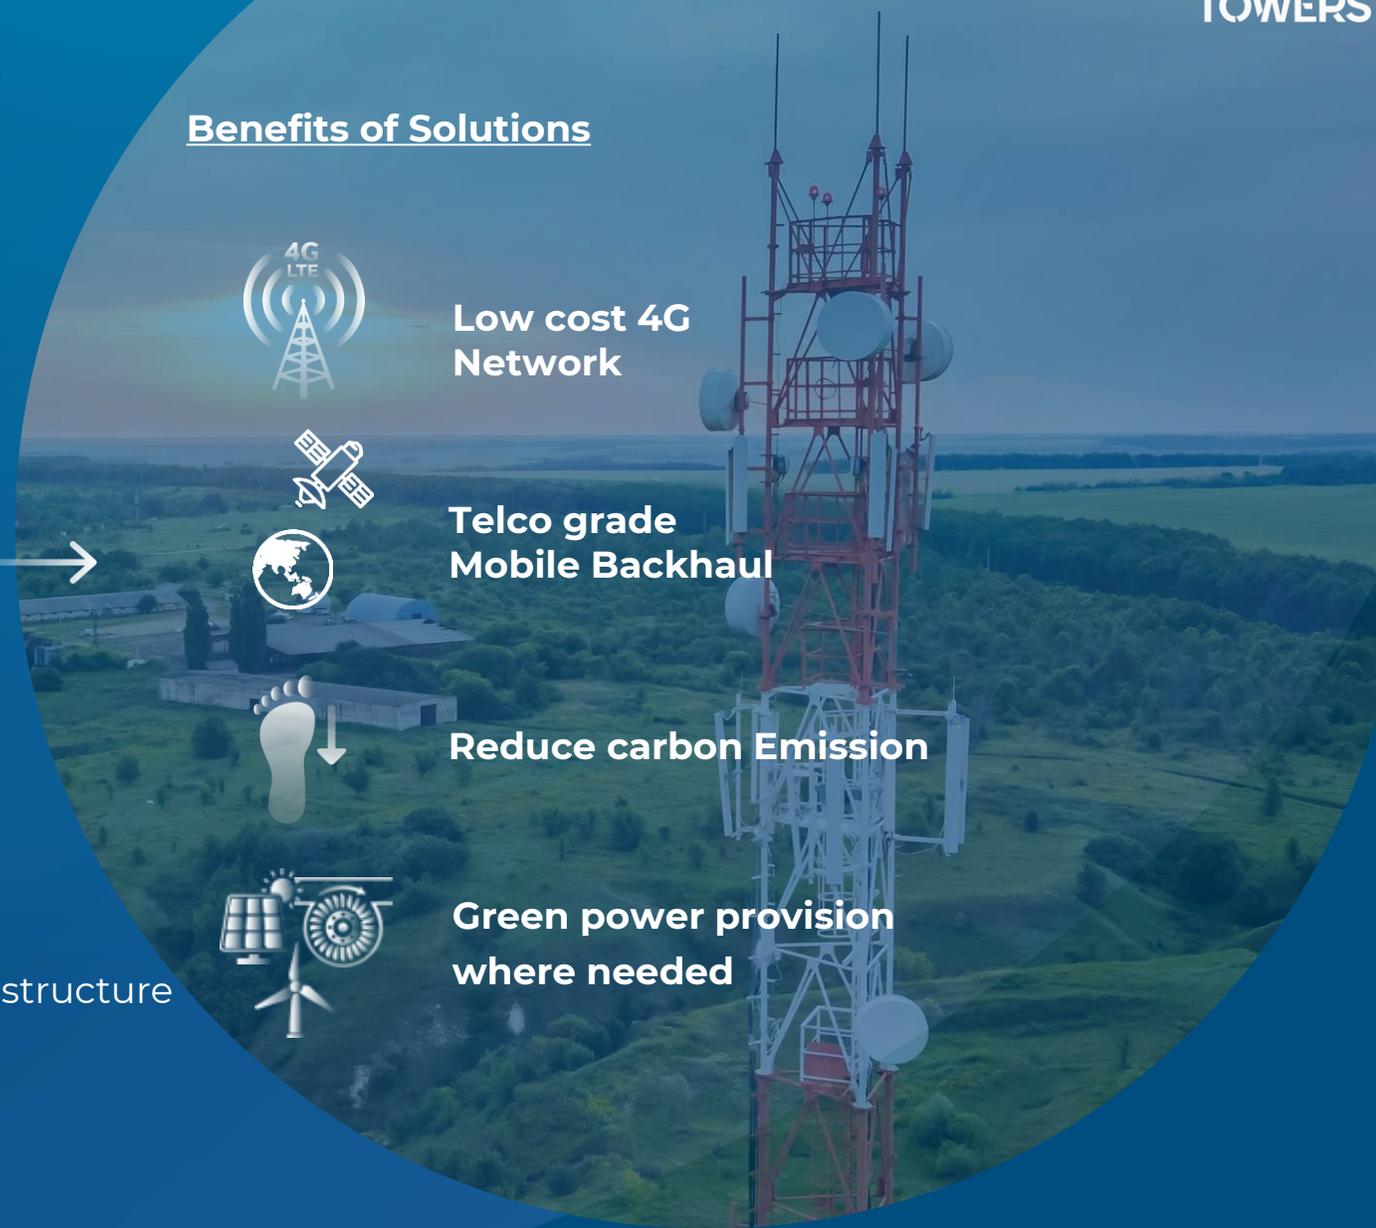

Telco grade Mobile Backhaul

Reduce carbon Emission

Green power provision where needed

# BENEFITS K-TOWERS BRING FOR REMOTE COMMUNITIES

A single tower supports **multiple functions**. Our towers in Western Papua New Guinea **enhance overall safety and security**, in addition to addressing rural communication needs with key MNOs such as Digicel, Vodafone, and Telikom PNG.

## Use-cases Examples

1. Real-time Communication and Alarm systems
2. Real-time Weather Beacons
3. Aerial Surveillance Coverage
4. Navigation Aids For Air Beacons And Aviation Safety

# DISASTER COMMUNICATIONS SOLUTIONS FOR MORE RESILIENT PACIFIC ISLANDS

**CommsBox**

All-in-one Emergency & Disaster Response Communication Box

**CommsBox Ultra**

Enhanced Version of Emergency & Disaster Response Communication Box

**SatPack**

Portable & user-friendly Satellite Communication Solution

# SATPACK

Portable, user-friendly 75cm SatPack for instant, high-speed internet Connectivity anywhere

Auto-pointing system for immediate, reliable, seamless connectivity

Automated operations, no technical expertise needed

Easy-to-carry design for front-line deployment

Reliable, fast, on-demand connectivity

Up to 50 Mbps  
(40 Mbps Downlink, 10 Mbps Uplink)

# COMMSBOX

Be prepared. Respond faster.

All-in-one  
boxed solution

Connects 5 users

High-speed internet  
on-demand with  
powerful broadband  
satellite service

Up to 50 Mbps access  
speeds

Rapidly deployed and  
effortlessly scaled

Reliable, on-demand  
connectivity

## Each Kacific CommsBox includes:

- Small, self-installing satellite dish in a self-contained case
- Preconfigured and connected modem and satellite electronics
- Solar-power energy pack
- User tablets for customer-friendly operation
- WiFi set up
- A sealed, shock-resistant, fire-resistant, buoyant and transportable all-inclusive container

# RELIABLE BACKUP SYSTEM IN TONGA DURING SERVICE OUTAGES

## Project

- Kacific is enhancing connectivity in the underserved areas of Tonga through **satellite-based mobile backhaul solutions, to ensure continuous communication services, mitigating the risk of cable breakages** that could disrupt operations and affect customer service.

## Solution

- Since June 2022, a **mobile backhaul solution** has been implemented in the Niuaus islands, with additional satellite terminal sites in **Vavau and Ha'apai**.

## Outcome

- Implemented a **reliable backup solution** that ensures uninterrupted communication services for end-users, protecting them from **potential disruptions** caused by cable cuts or unforeseen incidents.

# SOLOMON TOWER PROJECT

## Project

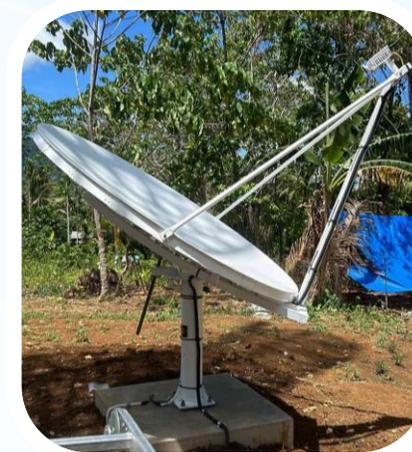

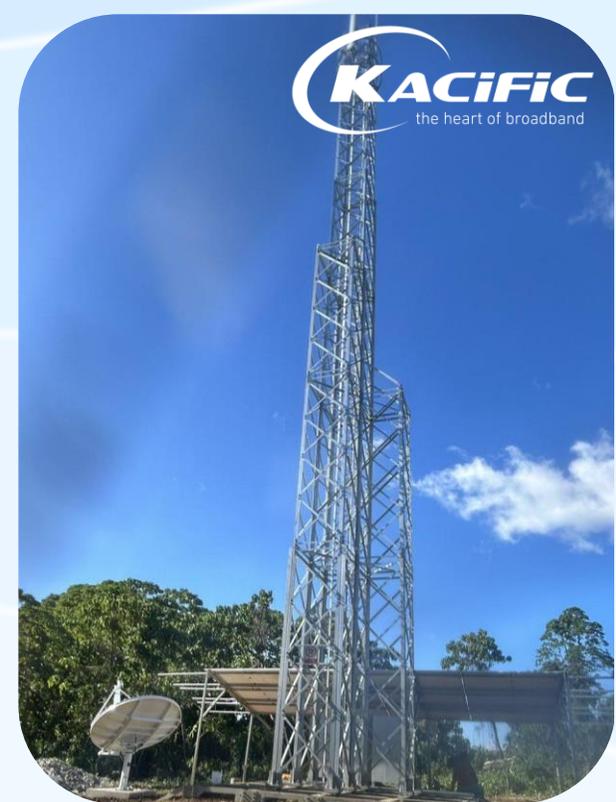

- Kacific is enhancing telecommunications in the Solomon Islands through its partnership with Solomon Tower Limited (STL). The Solomon Islands National Broadband Infrastructure Project (SINBIP) will construct **161 mobile tower sites** over three years to improve connectivity.

## Progress

- STL has activated **13 mobile sites** on Guadalcanal and a VSAT site on Russell Islands with Kacific's 1.8m satellite terminals. The Nukufero VSAT tower, operational since September 2024, has provided the community with internet access for the first time in decades.

## Outcome

- This technology addresses **infrastructure challenges**, enabling residents to **access vital information** and supporting the **government's goal of inclusive development**.

**Solomon Islands Government**
